TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, SQL, Bash
Frontend: React, React Three Fiber, Three.js, HTML, CSS, GLTF
Backend & Data: Node.js, FastAPI, Spring Boot, REST APIs, MongoDB, IBM DB2, NumPy, Pandas
AI/ML: OpenAI API, PyTorch, Semantic Search, Multimodal Models (Video/Text), Model Evaluation
Tools & Platforms: Git, GitHub, GitLab, Jira, Figma, Vercel, Railway, Prometheus, Notion, Agile/Scrum

EXPERIENCE

Broadridge Financial Solutions

May 2026 – Aug 2026

Software Developer Intern

Toronto, ON

- **Designed an AI release-readiness tool** for the Canadian tax engineering team, whose platforms serve investor communications for **265 Canadian financial institutions**, generating changelog, NFR-impact, and test-focus reports from consolidated sprint evidence.
- **Built a validator agent running 8 automated checks** with live Jira and GitLab connectors auto-linking commits and merge requests across **5+ repositories**, validated on a production release manifest at a **16.5/17 compliance score**.
- **Built an AI-assisted COBOL modernization PoC** transforming legacy tax-slip logic into structured YAML rules and a **Java 21 / Spring Boot REST** service with dynamic table routing, optimistic concurrency, and parameterized DB2 updates, verified by **2 integration tests with 0 failures**.

Windscribe

May 2025 – Nov 2025

Software Developer Intern

Toronto, ON

- Engineered a ticket automation extension that autonomously resolved **30% of support load**, cutting response times by **50%** and improving **Service Level Agreement compliance** at scale for **89 million users**.
- **Developed and deployed an internal Slackbot “Demerzel”** with thread-based context management, TOML-configured endpoints, Prometheus metrics, and Notion-integrated memory prompts built from **over 650 articles** of Windscribe documentation.
- **Integrated the OpenAI API for automated ticket answering**, generating context-aware summaries and responses that cut manual triage from **90 to 20 seconds** per ticket.

PROJECTS

MoTrack.co | React, TypeScript, Node.js, MongoDB, Three.js

February 2025 – Present

- **Built and shipped a full-stack companion app** for Supercell’s mo.co game (build creator, item database, tier lists, leaderboards) with client-side caching and shareable build links, owning the product end to end from concept to launch.
- **Grew the platform to 30,000+ monthly active users** and a **1,500-member Discord community**, driving retention with a Discord bot that surfaces live build data from the app to keep users engaged across platforms.
- **Engineered a real-time 3D character customizer** with Three.js and React Three Fiber (GLTF pipeline, morph targets, material swapping), persisting presets in MongoDB for cross-device reuse.

Cognitech | React, Three.js, Python, FastAPI, Semantic Search, Vercel, Railway

January 2026

- **Shipped an end-to-end product** (React and Three.js frontend, deployed on Vercel and Railway), translating model outputs into clinician-friendly “behavioural fingerprints,” supporting human-in-the-loop assessment workflows.
- **Built an AI-powered video indexing and semantic search tool** that auto-generates timestamped behavioural annotations from clinical footage, cutting psychologists’ manual review from hours or days to seconds.
- **Implemented a production-minded Python and FastAPI backend** integrating TwelveLabs video understanding models to serve real-time analysis **without storing sensitive patient data**.

EDUCATION

University of Western Ontario

Expected 2028

Dual Degree: BSc, Honours Specialization in Computer Science & HBA, Ivey Business School

London, ON

- **GPA:** 3.9/4.0 ; Western Scholarship of Distinction (\$3,500), National Merit Scholarship (\$2,000), Chris Binns-Smith Memorial Scholarship (\$5,000)
- **Awards:** #25 on Product Hunt for Puddle (October 3, 2026), IBM watsonx Orchestrate Challenge Top 50 of 2000+ global participants, Hack The 6ix Finalist of 400+ participants, WFN Odyssey Cup Competition First Place (\$500), TD Innovation Sprint Finalist, 2nd Place winner of 2024 Toronto Regional Real Estate Board Contest (\$2,500), Ontario 2023 Summer Company Grant (\$3,000)
- **Leadership:** Director of Flagship - Western Artificial Intelligence Club, Vice President of Design - Western Founders Network Club, Director of Outreach - Tech for Social Impact Club, Developer - Western Developer’s Society
