Daniel Tan

Toronto, ON | 416-732-5553 | hello@danielrltan.com | linkedin.com/in/danielrltan | github.com/danielrltan

Skills & Interests

Languages: TypeScript, JavaScript, Python, Java, C++, Swift, SQL, Bash
Frontend: React, React Three Fiber, Three.js, HTML, CSS, GLTF
Backend & Data: Node.js, FastAPI, Spring Boot, REST APIs, WebSockets, MongoDB, SQLite, IBM DB2, NumPy, Pandas
AI/ML: OpenAI API, PyTorch, Semantic Search, Multimodal Models (Video/Text), Model Evaluation
Tools & Platforms: Git, GitHub, GitLab, Jira, Figma, Vercel, Railway, Fly.io, Docker, Prometheus, Notion, Agile/Scrum
Interests: Kickboxing, Skiing, Fashion, Mechanical Keyboards, 3D Modelling & Roblox UGC (Blender), Brawl Stars

Experience

Broadridge Financial Solutions **May 2026 – Aug 2026**
Software Developer Intern *Toronto, ON*

- **Designed an AI release-readiness tool** for the tax engineering team behind investor communications for **265 Canadian financial institutions**, generating changelog, NFR-impact, and test-focus reports from consolidated sprint evidence.
- **Built a validator agent running 8 automated checks** with live Jira and GitLab connectors auto-linking commits and merge requests across **5+ repositories**, validated on a production release manifest at a **16.5/17 compliance score**.
- **Built an AI-assisted COBOL modernization PoC** transforming legacy tax-slip logic into structured YAML rules and a **Java 21 / Spring Boot** REST service with dynamic table routing, optimistic concurrency, and parameterized DB2 updates, verified by **2 integration tests with 0 failures**.

Windscribe **May 2025 – Nov 2025**
Software Developer Intern *Toronto, ON*

- Engineered a ticket automation extension that autonomously resolved **30% of support load**, cutting response times by **50%** and improving **SLA compliance** for **89 million users**.
- **Deployed an internal Slackbot "Demerzel"** with thread-based context management, TOML-configured endpoints, Prometheus metrics, and Notion-integrated memory prompts built from **650+ articles** of Windscribe documentation.
- **Integrated the OpenAI API for automated ticket answering**, generating context-aware summaries and responses that cut manual triage from **90 to 20 seconds** per ticket.

Projects

Poddleball.com | *JavaScript, Node.js, WebSockets, Three.js, Swift, SQLite, Fly.io* **September 2026 – Present**

- **Launched a real-time multiplayer pickleball game played by swinging your phone or AirPod as the paddle**, from Hack the North 2026; placed **#25 on Product Hunt** with **2,000+ unique visitors** in week one, **750+/week** since.
- **Engineered an authoritative 60 Hz WebSocket game server** hosting up to **120 concurrent courts**, load-tested to 400 players at a sub-30 ms p99 tick, with client-side prediction cutting p95 ball error on lossy Wi-Fi from **223 to 15 cm**.
- **Turned raw motion-sensor data into paddle swings** (Swift CoreMotion, browser motion APIs, MediaPipe body tracking), tuned on **140 labelled real swings**; added Google sign-in, SQLite stats, leaderboards and server-side anti-cheat.
- **Shipped 320 commits in 16 days** by orchestrating parallel AI coding agents with file ownership and numeric regression tests, documenting **200+ design decisions** in an engineering build log.

MoTrack.co | *React, TypeScript, Node.js, MongoDB, Three.js* **February 2025 – Present**

- **Built and shipped a full-stack companion app** for Supercell's mo.co game (build creator, item database, tier lists, leaderboards) with client-side caching and shareable build links, owned end to end from concept to launch.
- **Grew the platform to 30,000+ monthly active users** and a **1,500-member Discord community**, driving retention with a Discord bot that surfaces live build data from the app.
- **Engineered a real-time 3D character customizer** with Three.js and React Three Fiber (GLTF pipeline, morph targets, material swapping), persisting presets in MongoDB for cross-device reuse.

Education

University of Western Ontario **Expected 2028**
Dual Degree: BSc, Honours Specialization in Computer Science & HBA, Ivey Business School *London, ON*

- **GPA:** 3.9/4.0; Western Scholarship of Distinction ($3,500), National Merit Scholarship ($2,000), Chris Binns-Smith Memorial Scholarship ($5,000)
- **Awards:** #25 on Product Hunt for Poddle (Oct 2026), IBM watsonx Orchestrate Challenge Top 50 of 2000+ globally, Hack The 6ix Finalist (400+ hackers), WFN Odyssey Cup First Place ($500), TD Innovation Sprint Finalist, 2nd Place in 2024 Toronto Regional Real Estate Board Contest ($2,500), Ontario 2023 Summer Company Grant ($3,000)
- **Leadership:** Director of Flagship - Western Artificial Intelligence Club, VP of Design - Western Founders Network Club, Director of Outreach - Tech for Social Impact Club, Developer - Western Developer's Society
